

*Both happen fast,  
so heed evacuation warnings immediately!*

## Before Floods & Debris Flows

- Pay attention to local emergency response messaging and heed evacuation notifications immediately
- Sign-up for local wireless emergency alerts sent by authorized government agencies
- Monitor incoming storms, especially if you live in burned areas or downstream/downslope of a burned area
- Make sure you have non-perishable emergency supplies and a disaster supply kit.
- Have an evacuation plan in place for you and your pets.
- Have a battery-powered AM/FM weather radio and a cell phone to listen for emergency updates and weather forecasts. Don't forget extra batteries!
- Talk to your insurance agent about purchasing flood insurance.

## During Floods & Debris Flows

- Remember: local authorities may indicate it is safer for you and your family to shelter in place if flash flooding is not impacting your neighborhood.
- Do not walk through moving water – just six inches of water can sweep an adult off his/her feet.
- Do not attempt to drive through a flood, debris flow, or into flooded areas. It takes only a foot of water to float or sweep away most vehicles.
