Household Hazardous Waste Removal

Examples of Household Hazardous Waste/Bulk Asbestos to be removed during Phase 1 Debris Removal:

- Paint
- Cleaners
- Solvents
- Oils
- Batteries
- Herbicides
- Pesticides
- Propane Cylinders
- Fluorescent Light Ballasts
- Compressed Gas Cylinders
- Fire Extinguishers
- Aerosol Cans
- Suspect Asbestos Containing Material (ACM) that can be removed in less than an hour (example: Transite Siding, Floor Tile, etc.)

Why is Household Hazardous Waste removed?

Following a fire, household hazardous waste products require special handling and disposal, especially if their containers are compromised. Household hazardous waste may pose a threat to human health, animals and the environment. Household hazardous waste removal will clear the way for proper removal of ash and debris, allowing the rebuilding process to begin.

Phase 1 debris removal is being conducted at no cost to property owners.

How will I know when the process has started and been completed?

DTSC crews will post a sign on each property when the Household Hazardous Waste removal is complete. In addition, DTSC will provide a public dashboard on the web that will track Phase I Completion.

Other Colors, Stakes and Symbols

- Orange Paint: Septic system location or damaged transformer
- Pink Paint: Suspect Asbestos Containing Material that would take more than an hour to remove and will be left in place
- White Stake and Signage: Site has been cleared of Household Hazardous Waste
- White X Mark: Empty Household Hazardous Waste container or cylinder
- White MT Mark: Fuel tank was empty, or contents transferred

New Deadline is January 15, 2021

2021 DEBRIS REMOVAL MISSION:

- Paint
- Cleaners
- Solvents
- Oils
- Batteries
- Pesticides
- Asbestos
- Compressed gas cylinders and tanks

As of XX/XX

2021 WILDFIRE CLEANUP IS HAPPENING IN:

- Alpine
- El Dorado
- Lassen
- Lake
- Nevada
- Placer
- Plumas
- Siskiyou
- Tehama
- Trinity

As of 10/20/21
